**ECONOMETRIC
CAREER DAYS** 2016

10 - 18 November

Profiler

**New
Data**

Optiver

Dear fellow students,

This November, the 14th edition of the Econometric Career Days (ECD) will take place. The ECD is the largest recruitment event for econometrics students in the Netherlands. In seven days, the ECD brings together students and a wide range of companies through cases, presentations, interviews, dinners, and informal networking activities.

Whether you are just starting your Bachelor or approaching the end of your Master, the ECD offers you the opportunity to **explore** the possibilities within econometrics. **Connect** with companies and fellow students, and **develop** a better understanding of where your interests and ambitions may take you. This two-sided focus fits well with this year's theme: **Explore. Connect. Develop.**

In this profiler, you will find an overview of the programme and all participating companies. Use it to discover which activities and organisations appeal to you most, and make the most of everything the ECD has to offer. Subscriptions open on the 7th of October. As some activities require it, make sure to have your updated CV ready.

Do not forget to follow us on Instagram and LinkedIn (@ecdrotterdam) and visit our website (ecdrotterdam.nl) for additional information. And never hesitate to reach out to us if you have any questions.

We look forward to welcoming you at the ECD 2026!

On behalf of the Econometric Career Days Committee,

Noor van Duuren
Chair Econometric Career Days 2026

Cases

A case is a perfect way to learn about a company's work field and their company culture. You get to work on a representative company case thereby allowing you to learn more about the company and to apply your analytical skills to tackle a problem. Afterwards there is either a lunch or drink included in a morning or afternoon case respectively. Here you get to talk to the employees and ask all your questions.

Presentations

Still trying to figure out what sectors suit you best? You could join us at one of the company presentations! In only 1.5 hours you will get a clear picture of a company, its employees, their daily work, career paths, and exciting projects. Moreover, there will be plenty of time to ask questions. In short, a simple but inspiring way to discover where your future could take you.

Company Dinner and Branch Dinner

Over a three-course meal, you'll get the chance to connect with company representatives in an informal yet professional way. Depending on the set-up, you either rotate between multiple companies from the same sector or spend the evening exclusively with one organisation. This unique setting allows for both meaningful conversations and relaxed networking, all while enjoying good food. This year we welcome two branch dinners and one company dinner.

Informal Activities

An informal activity lets you connect with companies in a relaxed, social setting. From wine and beer tastings to an escape room, these sessions create the perfect balance between fun and career exploration. You'll have plenty of time to meet professionals and discover which culture suits you best. It is a unique way in order to see if you are character wise a good fit for the company and whether their atmosphere matches yours.

Workshops

In a workshop, you'll actively develop new skills guided by company experts. Expect an interactive session where theory quickly turns into practice, whether through coding, strategy, or teamwork exercises. You'll walk away with both knowledge and connections.

Interviews

Do you want personal attention from your dream company? In one-on-one interviews, selected students sit down with recruiters and employees for an in-depth conversation. This is your moment to showcase your ambitions, ask targeted questions, and leave a lasting impression. A unique chance to truly stand out.

Moments of Impact

This year, Impact Day evolves into Moments of Impact: dedicated sessions spread throughout the Econometric Career Days that connect you with organisations actively driving positive societal and environmental change. Each participating organisation works on a clear societal or environmental theme through its product or service, measures and reports on its results, and has that commitment reflected in how it is structured and run. During these sessions, you'll discover how econometric skills can be used to tackle real challenges in areas such as healthcare, public finance and the responsible use of data and AI. Clever Republic, Gupta Strategists, the Ministry of Finance, and PhD Drink are taking part in Moments of Impact. It's the perfect opportunity to combine career exploration with meaningful impact, so make sure to sign up! Note that all the companies participating on Moments of Impact are indicated with a yellow fade in this profiler.

PhD Drink

At the PhD Drink, doctoral candidates will share their research journeys, daily experiences, and the challenges and rewards of pursuing a PhD. You'll gain an authentic perspective on academic life and discover how research connects to real-world issues. With plenty of time for informal conversations over drinks, it's an inspiring way to explore whether a PhD could be part of your own future path.

Meet us at the PhD Drink

Thursday 12 November

15:00 - 17:00

On the **10th of November**, the fourth edition of the ECD Talks will take place. With its theme being "Econometrics in Sports: turning data into performance", four experts from the sports industry and academia will discuss how tactical decisions, player scouting, and match strategy are increasingly driven by data, and the questions this raises about how far the numbers can really take us.

Ruud Koning

Ruud Koning is professor of Sports Economics at the University of Groningen, researching competitive balance and the instruments used to influence it. He co-edits books on statistical methods in sports. A former Rotterdam marathon runner (1993, 3:30:45 – shorter distances, slower now), he's also a passionate follower of soccer, speed skating, and track and field, where he believes data and analysis of in-field performance and training is what gives athletes their edge.

Lara van Steen

Lara is a data analyst at the Royal Dutch Football Association (KNVB), where she combines her passion for football with data-driven analysis. With a background in econometrics and experience as a football coach, she brings a unique perspective on how data can improve decision-making in sports.

Sjoerd de Vries

Sjoerd is a consultant and data analyst at Hypercube, helping sports federations, leagues and clubs make data-driven decisions on growth strategies and new stadiums. An econometrician from Vrije Universiteit Amsterdam and former high-level youth footballer, he works where sport meets mathematics, designing competition formats and rankings that are fair, exciting and transparent.

Jop Beuger

Jop has spent 15 years reading the numbers behind elite sport and learning the same lesson everywhere: a technically perfect model is only useful when it works in practice. He now works at TeamNL, building data foundations at the Dutch Olympic & Paralympic Committee. He also speaks about the role of data science in sports.

Join the panel discussion through live polls, the throwable microphone, or the closing Q&A! The evening ends with a networking reception, complete with free drinks and a LinkedIn photographer to help you capture the perfect professional shot. The event is in **English** and open to students of all studies and study phases.

ECD 2026

Wie zijn wij?

De Nederlandse Publieke Omroep (NPO) zorgt er samen met de publieke omroepen voor dat miljoenen Nederlanders toegang hebben tot betrouwbare en diverse media. In een veranderend medialandschap werken we aan één centrale uitdaging: hoe houden we publieke content toegankelijk, vindbaar en relevant voor iedereen?

Data en AI achter de schermen

Data en AI helpen ons kijk- en luistergedrag te analyseren, programmering te verbeteren en ons media-archief toegankelijker te maken. Daarbij staan maatschappelijke impact en publieke waarden centraal. Hoe bereiken we verschillende doelgroepen en zetten we AI verantwoord in? Juist op het snijvlak van data, technologie en maatschappelijke vraagstukken liggen interessante uitdagingen.

Wat kun je verwachten tijdens de Field Trip?

Tijdens deze Field Trip krijg je een uniek kijkje achter de schermen van de NPO. Je ontdekt hoe data en AI worden toegepast binnen de publieke media en welke rol kwantitatieve analyses spelen bij het nemen van beslissingen.

Daarnaast maak je kennis met verschillende onderdelen van de dagelijkse mediawereld, waaronder radio, eindregie en ondertiteling. Zo ervaar je hoe data, technologie en creatieve processen samenkomen om programma's bij miljoenen Nederlanders te brengen.

Verwacht geen standaard bedrijfsbezoek, maar een interactieve kennismaking met de praktijk. Je krijgt de kans om mee te denken over echte mediavraagstukken en te ontdekken hoe analytische inzichten kunnen bijdragen aan betere beslissingen.

Waarom is dit interessant voor econometristen?

De NPO wordt steeds datagedreven. Econometristen kunnen met hun kennis van statistiek, modellering, optimalisatie en data-analyse bijdragen aan uiteenlopende vraagstukken: van het voorspellen van kijkgedrag tot het optimaliseren van processen en het ontwikkelen van AI-toepassingen.

We verwachten van beginnende medewerkers niet dat ze alles al weten. Nieuwsgierigheid, leergierigheid, initiatief en verantwoordelijkheid nemen zijn minstens zo belangrijk. Ook goed samenwerken en openstaan voor andere perspectieven zijn essentieel.

Ben jij benieuwd hoe econometrie en data science bijdragen aan de toekomst van publieke media?
Ontdek het tijdens de NPO Field Trip!

MAIN PARTNERS

NewData

Your degree opens doors. Why wait to graduate?

NewData Student | Student Jobs & Graduate Careers in Data, AI and Software

NewData Student (formerly DataStudent) connects students and graduates with part-time jobs, project opportunities and full-time roles in data analytics, data science, artificial intelligence (AI) and software development. Based in Rotterdam and founded eight years ago by econometricians, we help analytical talent turn academic knowledge into practical experience.

Put your analytical skills into practice

What can you do with a background in econometrics or another quantitative discipline? Through NewData, you can work on real business challenges, such as:

- Building a machine learning model for a small or medium-sized enterprise (SME).
- Implementing AI at a consultancy firm.
- Migrating legacy code for a pharmaceutical company.
- Developing dashboards that turn data into actionable business insights.

Your opportunities also extend to strategy consulting, mergers and acquisitions (M&A), and trading fields where quantitative skills and an analytical mindset make a difference.

Explore different organisations and industries

We have worked with organisations ranging from startups and SMEs to public institutions and corporations. Familiar names include TNO, Aon, Robeco, PepsiCo, Optiver and leading hospitals. Across

logistics, marketing, healthcare and finance, we help you explore different industries and discover where your interests and strengths fit.

Find a student job or your first graduate role

Whether you want a relevant part-time job alongside your studies, a project during a gap year or your first full-time role after graduation, we start with your ambitions.

Which working environment suits you? We look beyond your CV to understand your mindset and potential. Through personal guidance and honest communication, we help you find opportunities to gain experience and develop your skills.

Join our team in Rotterdam

Interested in recruitment, business development or entrepreneurship? We are also keen to meet students and graduates who would enjoy working in our own office team.

Help match talent with organisations, build relationships and get a behind-the-scenes look at a fast-growing company. You will contribute to our growth while staying close to the world of data, AI and software.

You bring the curiosity and potential. We help you find the experience to grow.

Meet NewData at the Econometric Career Days in Rotterdam, or visit NewData to explore opportunities in Data, AI and Software.

Do you thrive in an environment where your growth and knowledge are constantly propelled to new heights? If so, you should get to know Optiver, a leading global market maker on the cutting-edge of technology, trading and research. Here's what we're all about:

The endless pursuit of excellence.

Ready to accelerate your growth in one of the most dynamic and fascinating industries there is? Discover Optiver, a leading global trading firm powered by technical innovation. For 35+ years, Optiver has been improving financial markets around the world, making them more transparent and efficient for all participants. With our focus on cutting-edge engineering, data science and research, we actively trade on 70+ exchanges, where we're trusted to always provide accurate buy and sell pricing – no matter the market conditions.

Pushing the envelope one idea at a time.

Every day at Optiver is an opportunity to solve the seemingly impossible. It's a place where you're empowered to build, code, develop and strategise ideas that push the boundaries of technological and analytical possibility. Every team member has an integral role to play in this endeavour. From traders to developers, engineers, researchers and business operations specialists, we all strive to find and own unique solutions. It's a melting pot of dynamic thought, fast execution and entrepreneurial spirit.

Your growth is our growth.

Our ethos is based on a hunger for growth that touches everything we do. Accelerated growth not only applies to our global expansion, but also to every individual team member. Our people continually strive to

improve and evolve into the best versions of themselves. Optiver fosters this constant growth by creating an environment where all are considered equal and afforded the same opportunities to flourish. This flat, growth-minded structure rings true across all of our global operations, which span offices in Amsterdam, London, Chicago, Austin, Sydney, Shanghai, Singapore and beyond.

The brightest of the bright.

When it comes to joining Optiver, the bar is set high – and for good reason. To remain at the forefront of market making, we need the best and brightest industry talent within our teams. Fortunately, we value potential over expertise, which is why we hire candidates from a diversity of backgrounds, studies and experience levels. No matter which walk of life they're from, when we find someone with the entrepreneurial spirit we seek, we take it upon ourselves to heavily invest into upskilling them with our world-class training programme.

Your next big growth opportunity could be in one of the following roles at Optiver:

- Quantitative Research Internship
- Quantitative Trading Internship
- Graduate Quantitative Researcher
- Graduate Software Engineer

To discover more about us, visit our website or contact us at recruitment@optiver.com. In the meantime feel free to learn more about who we are and what we do by following us on LinkedIn, Instagram, Twitter and Facebook.

About IG&H

Since 1988, IG&H has been accelerating the digital transformation of organizations in Healthcare, Retail, and Financial Services. What sets us apart is our unique ability to combine deep sector expertise with strategy, technology, and data to create real business impact. Where many stop at advice, we go further: from strategy to implementation, from technology to managed services. Our promise is clear: Make Strategy Work.

Our Core Values

At IG&H, our culture is defined by being both high daring and high caring. We dare to challenge the status quo, take bold steps, and think beyond conventional boundaries. At the same time, we deeply care for our people, our clients, and society. This balance creates an environment where trust, growth, and innovation thrive. We believe in working side by side with our clients, building lasting partnerships, and creating tangible results that matter.

Our Vision for the Future

The pace of change in Healthcare, Retail, and Financial Services will only accelerate. Digital ecosystems, AI-driven insights, and platform solutions are reshaping how organizations operate and connect with their customers. At IG&H, we envision a future where organizations not only keep up but lead by harnessing the power of strategy and technology together.

Our ambition is to be Europe's leading partner in sector-driven digital transformation – enabling organizations to reinvent themselves, unlock sustainable growth, and deliver meaningful impact to society. By continuously investing in talent, technology, and innovation, we ensure that

our clients are always one step ahead.

At IG&H, we don't just talk about transformation. We make it work.

Econometrists at IG&H

As an econometrist at IG&H, you can turn your analytical expertise into real business impact. Join one of our Financial Services, Retail, or Healthcare teams as a Junior Consultant, helping clients improve their strategies and tackle complex challenges. Or bring your technical and consulting skills to our Data & AI team, where data scientists and engineers work together to develop innovative Data & AI solutions for our clients.

Data Consultancy Dinner

At IG&H, we believe the best way to learn about consultancy is to experience it firsthand. During the Data Consultancy Dinner, you'll meet our consultants and discover how we combine strategy, sector expertise, and technology to help leading organizations in Healthcare, Retail, and Financial Services transform and grow.

Curious about how your ideas can shape the future of business and technology? Come join us at our table, we look forward to meeting you!

About IMC

IMC is a global trading firm powered by a cutting-edge research environment and a world-class technology backbone. Since 1989, we've been a stabilizing force in financial markets, providing essential liquidity upon which market participants depend. Across our offices in the US, Europe, Asia Pacific, and India, our talented quant researchers, engineers, traders, and business operations professionals are united by our uniquely collaborative, high-performance culture, and our commitment to giving back. From entering dynamic new markets to embracing disruptive technologies, and from developing an innovative research environment to diversifying our trading strategies, we dare to continuously innovate and collaborate to succeed.

Who we are

IMC stands for International Marketmakers Combination. It was founded in 1989 by two traders working on the floor of the Amsterdam Equity Options Exchange, when trading was still executed manually. IMC was among the first to spot the importance of technology and innovation in the evolution of market making, and invested early—helping shape the future of trading. Today we are 2,100+ people across 10 global offices, active on 120+ exchanges and all major asset classes. Our collaborative, high-performance culture sets us apart: IMCers turn our competitive instincts outward, with traders, engineers, and researchers working side by side on real problems.

Our culture: built on our core values

Dare to continuously innovate. Keep both feet on the ground. Collaborate to succeed. Take responsibility. Build for our future.

Our ambition: to be the world's leading trading firm

That means the most robust trading strategies, built on world-class pricing and quant research that generates alpha; covering most major trading opportunities globally, across geographies, asset classes, and financial instruments; and continuing to cultivate our exceptional culture, with unparalleled opportunities for high performers.

Why an econometrician fits at IMC

Our quant and trading teams combine collective intellect to price what others can't. That is modeling and statistical rigor under uncertainty – exactly what econometricians are trained for – paired with cutting-edge technology, including AI, machine learning, and large-scale computing.

No matter your level or background, there's nothing you can't achieve at IMC. Interns and graduates make an impact from day one – no busy work. We give our talented, diverse people lots of responsibility early, exposing you to complex, mission-critical problems and providing the training, tools, and support to supercharge your problem-solving skills at speed. What we expect in return: ambition, entrepreneurship, and ownership – taking calculated risks to seize opportunities and truly add value.

The Future of Supply Chain Planning

We are a leading game changer in supply chain planning solutions. The world's largest companies trust our innovative software and services for value-driven supply chain optimization.

A Global Team of Talent

We prioritize our talented team, consisting of over 1,500 passionate and creative individuals from over 67 nationalities. Together, we tackle real-world challenges through a combination of mathematics and technology. Operating from our headquarters in Belgium and regional offices across Brazil, China, France, Germany, India, the Netherlands, Spain, and the US, we work together as one global team.

Grow Your Expertise

Committed to growth and expertise, we invest in developing talent and expanding our expertise. We believe working with passion and pride is key to delivering our promise and establishing successful partnerships with our customers including Bridgestone, Johnson & Johnson, PepsiCo, Procter & Gamble, and Nestlé. By continuously striving for long-term collaboration and excellence, we shape the future of supply chain planning.

Opportunities for Students

Every year we have master thesis topics for students to work on. Outside of this we don't offer any other internships at this time.

Life at OMP

OMP has its own employee cookbook. Colleagues from around the world contributed 40 recipes, celebrating cultural diversity and shared moments beyond work. Originally created for our 40th

anniversary. The cookbook is still being enjoyed by colleagues every day. Also every year the Dutch teams goes on a teambuilding and Christmas dinner. Outside of this we also organize at least two instances per year with the EU OMP organization outside of the Netherlands.

Ready to Join OMP?

We are a leading game changer in supply chain planning solutions. The world's largest companies, including Johnson & Johnson, Procter & Gamble, and Nestlé, count on our smart software and services to optimize their supply chains. Our commitment to people and innovation is our key driver of success. That's why we continuously invest in growing talent and industry expertise. Are you ready to join over 1,500 passionate colleagues of over 68 nationalities? We work as one team from our head office in Belgium and regional offices in Brazil, China, India, the US, and other countries.

Build supply chain futures

Find your challenge

We are OMP, a leading game changer in **supply chain planning solutions**. The world's largest companies count on our **smart software and services** to optimize their supply chain.

Do you hold a master's degree or PhD in industrial engineering, software engineering, system engineering, computer science, informatics, logistics, operation research, or mathematics?

Let's talk and explore where our skills fit best. We regularly hire across our **commercial, consulting, and product development teams**, and together we'll look for a suitable position.

Supply Chain Consultant

You equip customers with innovative supply chain solutions, analyze the planning challenges, assist in the solution design, implement and validate the solution, and ensure a smooth go-live.

Solution Consultant

You deep dive into one of our industry-specific solutions to improve our OMP software solution and enrich its functionality. You gather input about our customer's needs and support the project team in implementing and delivering high-quality, fully tested, and well documented solutions.

Founded in 1979 in a modest Rotterdam attic, SKIM has grown into a global insight-based consultancy that empowers brands to elevate their pricing, innovation, and communication strategies with clarity and confidence.

We partner with leading companies -including Philips, Unilever, Google, and Danone - to navigate complexity and drive growth. Our work spans four key areas:

- Pricing & Revenue Management: Strategies rooted in behavioral modeling to deliver sustainable, profitable outcomes.
- Brand Communications: Messaging that resonates, using proven psychological frameworks.
- Product Innovation: Guiding ideas to market with real consumer insight.
- Advanced Analytics & Modeling: Translating data into strategic clarity using AI, choice modeling, and simulations.

Our strength lies in combining quantitative and qualitative methods—from mobile testing and DigiShop simulations to the SKIMulator—offering actionable insights based on real-world behavior.

SKIM is powered by over 300 SKIMmers across 13 offices, representing more than 40 nationalities. Our culture encourages individuality, ownership, and collaboration. At the helm are Co-CEOs Karin Lieshout and Joris Huisman, who embody our inclusive, future-facing approach to leadership.

Innovative

It has been at SKIM's heart that even whilst carrying out state-of-the-art research, SKIMmers still have new ideas and thoughts that will help our clients even better. The one thing we have learned from the past

45 years is that when bright people have a good idea, giving them the freedom to pursue it is always worth it. What we are saying: we want to hear what your ideas are because those ideas will deliver the quality we strive for.

People-oriented

We want SKIMmers to feel engaged in their job and to feel they have a platform to grow and discover what they would like to do. That's why we like to base your route, together with you, on your interests and strengths! In the past, we have seen that focusing on these matters unlocks people's true potential and fulfillment in a job. Besides, you are only just starting your career, right? Let's explore what is out there!

Curious about SKIM and enjoy discovering new wines?

Then this event is for you! We're hosting a special wine tasting in collaboration with Rotterdam wine bar Walsjerot. During the evening, you'll be guided through a selection of wines while learning more about the stories and flavors behind them. Along the way, you'll also get to know SKIM: who we are, what we do, and what it's like to work with us. This is a relaxed and informal opportunity to connect with our team, ask questions, and learn more about career opportunities at SKIM. And don't worry if wine isn't your thing. You're more than welcome to join with an alcohol-free drink and enjoy a fun evening getting to know the SKIM team.

Basic PARTNERS

About ABN AMRO Global Markets

ABN AMRO is one of the leading banks in the Netherlands, serving retail, private, corporate, and institutional clients worldwide. The bank employs ~25,000 people globally, of whom more than 20,000 are based in the Netherlands. Within the bank, Global Markets is responsible for activities in the financial markets, helping clients raise capital, manage financial risks, and navigate changing market conditions.

What is Global Markets?

Global Markets covers a broad range of products and activities, including Foreign Exchange (FX), Interest Rates, Credit, Fixed Income Derivatives, and Debt Capital Markets (DCM). Teams across Sales, Trading, Quantitative Analysis, and Debt Capital Markets work closely together to provide financial market solutions to corporates, financial institutions, investors, and public sector organizations.

Why ABN AMRO Global Markets?

ABN AMRO has a long-standing presence in European financial markets and, until recently, operated one of the largest dealing rooms in Europe. This provides employees with direct exposure to live markets, institutional clients, and a wide variety of financial products. For students with a background in Econometrics, Mathematics, Data Science, Physics, or related quantitative disciplines, Global Markets offers the opportunity to apply analytical skills in a fast-paced environment where decisions are driven by data, market developments, and risk considerations.

Meet the Global Markets Trainees

During the Econometric Career Days, you will have the opportunity to meet current Global Markets trainees and learn more

about their experiences within the division. Over an informal dinner, they will share what the Global Markets Traineeship involves, discuss the desk rotations they have completed, and explain how they explored different career paths within the organization.

An informal evening

The evening is intended as an open and informal setting. Whether you are interested in trading, financial markets, quantitative analysis, risk management, or simply curious about the work we do, there will be plenty of opportunity to ask questions and gain a realistic impression of what it is like to start your career at ABN AMRO Global Markets.

Internships & Traineeship

ABN AMRO offers internships throughout the year, as well as the Global Markets Traineeship, which has intake moments in March and September. The vacancy for the March intake typically opens around November.

We look forward to meeting you during the dinner and discussing the opportunities available within Global Markets.

More information about internships and the traineeship can be found at werkenbijabnamro.nl, or by contacting recruitment.globalmarkets@nl.abnamro.com.

Data, AI and design

ADC is a boutique Data and AI consultancy with offices in the Netherlands, Sweden, and Denmark, and an award-winning data design studio, CLEVER*FRANKE, embedded in the group. We help data-driven leaders in complex, high-stakes environments move fast without losing control. Our work focuses on four core outcomes: growing revenue and margin, moving from AI pilots to scale, reducing risk while staying confidently compliant, and building data products people love to use.

What makes ADC different

What makes ADC unique is the combination of strong analytical thinking, hands-on consulting, deep sector knowledge, and design. ADC was founded by econometricians, and that background is still part of how we work today: structured, evidence-based, and focused on outcomes that matter. At the same time, we are not just about building models or dashboards. By combining data, AI, and design, we create solutions that are technically strong, easy to understand, and actually adopted by people in their day-to-day work.

Turning AI into real impact

We are focused on helping clients move beyond AI experiments and pilots towards solutions that are trusted, scalable, and embedded in real workflows, always in a way that is responsible, secure, and fits the organisation. As AI matures across industries, that focus on real, lasting impact only becomes more important. Looking ahead, we see room to grow beyond where we are today, expanding into new markets and industries as we continue building on what we've established so far.

Your career at ADC

Econometricians are a great fit for ADC because they are trained to combine quantitative skills with practical problem-solving. They know how to work with uncertainty, spot patterns, test assumptions, build models, and translate analysis into clear recommendations. In an entry-level role, you'll join a team of experienced econometricians who have already built their careers in this field, and you'll learn directly from them as you take on real projects from day one. We don't expect you to know everything right away. What matters most is curiosity, analytical thinking, ownership, clear communication, and the motivation to learn. If you enjoy solving complex problems with data and turning analysis into real-world impact, ADC is the right place to start your career.

Designing a Causal Test for a New Airline Pricing Engine:

In this case, you will act as decision scientists at a low-cost European airline assessing whether a new pricing engine truly increases revenue. A simple comparison is insufficient, as passenger behavior, connecting itineraries, and competitor reactions can distort the results.

Your challenge is to design a credible approach to measure the causal impact. You will consider data collection, treatment and comparison groups, counterfactuals, experimental design, spillovers, and identification assumptions. The goal is to build and defend a robust approach—not find one perfect answer.

A leading asset management provider

APG is one of the largest pension service providers and pension investors in the world. We support Dutch pension funds by providing pension administration, communication, advisory services, and asset management. On behalf of our clients, we manage more than €600 billion in pension assets and help secure the retirement income of millions of participants in the Netherlands. APG is unique because it combines deep expertise in pensions and investments with a strong societal purpose: creating sustainable and affordable pensions for current and future generations.

Our values and purpose

At APG, our values guide everything we do. We believe in connecting with others, taking responsibility, acting with integrity, being transparent, and keeping the interests of participants at the heart of our decisions. These values help us maintain the trust of clients, pension participants, regulators, and society as a whole.

Building a future-proof APG

Our vision for the future is outlined in our Strategy 2030. APG is transforming into a more efficient, digital, data-driven, and future-proof organization. We are preparing for the new Dutch pension system while investing in innovation, automation, artificial intelligence, and sustainable growth. At the same time, we aim to remain a reliable long-term partner for pension funds and their participants in a rapidly changing world.

Why econometricians fit APG

Econometricians are a strong fit for APG because data, modelling, and quantitative analysis are central to many of our

activities. From investment strategies and risk management to business analytics, econometricians help transform complex data into insights that support better decisions. We look for graduates who are analytically strong, curious and eager to learn. In addition, we value collaboration, communication skills, and a genuine interest in contributing to meaningful societal outcomes through their work.

AI at APG Asset Management

For APG Asset Management, AI plays an increasingly important role in supporting data-driven decision-making, digital innovation, and operational efficiency. As part of APG's broader digital transformation strategy, AI-enabled tools such as Microsoft Copilot help employees analyze data, summarize complex documents, create reports, and process information more efficiently. AI and digitalization are viewed as strategic enablers that help APG Asset Management become more future-proof, efficient, and innovative.

The APG Quant Allocation Game.

During the APG Quant Asset Management case, you will discover some of what it takes to be a successful Quantitative Portfolio Manager. The case will introduce you to portfolio management in a systematic way, teach you the basics of some algorithm selection, how the data quality can influence the optimal composition of a portfolio and let you experience the difference between trading strategies in theory and in practice.

In a world full of opinions, we work on the facts.

Statistics Netherlands (CBS) collects, analyses and publishes data about the Netherlands. From the economy to energy; from work to well-being. Our role is to provide reliable facts for decision-makers and policy-makers, and to help everybody understand what is really going on in our society.

We analyse the trends and figures, and make sure that people know what is really happening in the Netherlands. It is complex work, but vital.

Everyone has an opinion, but changing society for the better starts with facts. Working for CBS means translating raw data into the knowledge that can help make the Netherlands stronger.

We welcome new ideas with open arms

At CBS, you can realise your potential and be yourself – together with over 2,000 colleagues who support each other.

We offer you plenty of freedom because we believe that people are at their best when they can be themselves. Diversity and talent help us come up with creative solutions and keep our analysis sharp.

We are much more than a statistics agency. CBS is a place that brings together knowledge, team work and fun, with a healthy dose of enthusiasm and commitment.

At CBS, colleagues from all kinds of disciplines work together to collect, process, and disseminate data and statistics. For instance, software developers, researchers, data analysts, and communications specialists.

Never stop learning at CBS

As a learning organisation, we actively encourage learning and embrace innovation. Whether you are just starting out or have years of experience, you will have the space and resources to carry on learning: in your specialist field, working with others and in your personal development.

The CBS Academy gives you access to training, workshops, and guidance from experienced colleagues from day one. This enables you to grow in your role and build a career filled with new opportunities.

Work placements make a difference

At CBS, we want to help students to gain hands-on professional experience. This encourages innovative thinking, helps us streamline our working methods, and strengthens our position in the labour market. Interns come up with new ideas and often become our new colleagues.

All the more reason to join us at CBS

Working at the Netherlands' official statistics agency comes with an attractive employment package. Come and help us work on the facts. Check out our current job vacancies at www.werkenbijhetcbs.nl and who knows, maybe we'll see you soon.

About Clever Republic

Clever Republic is a niche consultancy firm focused on creating business value through the practical implementation of Data Governance and Data Management. We connect the dots between strategy, data, business terminology, people, policies, processes and technology.

What Makes Us Unique

What makes Clever Republic unique is our combination of conceptual thinking and practical implementation. Rather than approaching Data Intelligence from a purely technical or advisory perspective, we focus on how organisations can use data effectively to achieve their goals and create measurable value.

We believe that successful Data Governance implementation requires more than frameworks and policies. It requires clear responsibilities, practical processes, reliable data and technology that supports the organisation. Just as importantly, it requires our consultants to truly understand the business context in which these elements need to work.

Our Clients and Industries

Clever Republic works with medium sized, large and very large organisations in both the public and private sectors. We operate across sectors including telecommunications, manufacturing, financial services, retail and consumer goods.

Why Econometricians?

They learn how to analyse data, identify patterns and translate data into meaningful insights. At Clever Republic, they can complement this analytical knowledge with practical consultant experience in Data Governance, Data Quality and Data

Management. This enables them to bridge the gap between using data effectively and creating the right conditions for data to be reliable, accessible, well managed and used responsibly. **We only hire Dutch people.**

Moments of Impact

Clever Republic contributes to positive change by enabling responsible and sustainable growth through Data Governance.

We help organisations improve decision making, reduce data related risks and comply with evolving legislation, including data protection and AI regulations. By doing so, we strengthen trust in data, technology and automated decision making. Our approach connects business objectives with people, processes, policies, data and technology. This helps organisations embed responsible practices into their daily operations and build governance structures that remain effective over time.

Connecting the Dots

In teams of four, you will support Telefie, a fictional telecommunications company, and develop an impactful, secure AI Governance strategy. Through short challenges, you will explore technical, compliance and business perspectives while discovering how data, people, processes, technology and policy connect in practice. Each challenge contributes to your strategy and LEGO build.

Making an Impact That Matters

For more than 175 years we have worked with leaders around the world, from the Global 500® to privately owned companies, to help them build a better future. To support their people. To succeed. And all of this with an eye on society. Progress begins with collaboration: listening, contributing ideas and taking real action. We make a difference by delivering genuine, measurable results with a workforce made up of the brightest minds in the industry. We do more than talk. We act.

Our Purpose and Values

The purpose of Deloitte is Making an impact that matters. The core values of Deloitte are: lead the way, serve with integrity, take care of each other, foster inclusion, and collaborate for measurable impact.

A Technology- and AI-Driven Future

Deloitte's future vision can be summarized as becoming a technology- and AI-driven organization that helps clients transform their businesses while creating meaningful economic, social, and environmental impact.

Your Career at Deloitte

There are currently several vacancies at Deloitte Netherlands. Most recruitment processes start with an initial interview, where interviewers will ask about your CV and motivation. For some roles, a case interview follows as a second stage, and occasionally a partner interview takes place as a final (third) stage. You can always arrange a coffee chat before the official application process begins to learn more about the role and the team.

Next Level Bank Case

During the Next Level Bank case, you will advise a fast-growing Dutch online bank on its next big investment. The case takes you through three key challenges: credit risk analysis, insurance pricing, and market risk management. You will evaluate acquisition targets, design a pricing strategy for car insurance, and apply option pricing models to assess investment opportunities. This case offers practical experience with financial risk and strategy in a structured way. By solving these challenges, you will develop clear, data-driven recommendations to support the bank's growth ambitions.

Growth and Development at EY

At EY, it's all about your growth and development. Your ambitions are at the center of everything we do. Whether you see yourself as a consultant, a change-maker, or a problem solver, you'll have the opportunity to make a real impact by working on meaningful projects alongside supportive colleagues, while continuing to develop your unique talents.

A Global Organization

EY is a global organization with 400,000 colleagues worldwide. In the Netherlands, we operate across Assurance, Tax, Strategy & Transactions (EY-Parthenon), and Consulting. Technology, sustainability, and innovation play a key role in everything we do. Within Consulting, you can explore a variety of areas, including People, Business, Technology, and Risk Consulting.

Your Career at EY

Working at EY means taking ownership of your career. We provide the support, flexibility, and opportunities you need to grow both professionally and personally. We foster an inclusive culture where diversity is valued, everyone feels respected, and you are empowered to bring your authentic self to work every day.

Meet EY Consulting

Tijdens de Econometric Career Days maak je tijdens een exclusief businessdiner in Rotterdam uitgebreid kennis met EY Consulting. De avond staat in het teken van het Financial Risk team. Dit team werkt met een jong en divers team van consultants aan projecten op het gebied van modellering, financiële en kwantitatieve risicoanalyse, audit support, data-analyse, AI en meer.

Discover Financial Risk

Je ontmoet collega's uit het team, ontdekt hoe het is om bij EY te werken en krijgt een goed beeld van de werkzaamheden, mogelijkheden en sfeer. Geen standaardpresentaties, maar open gesprekken, inspirerende verhalen en volop ruimte om al je vragen te stellen.

Shape Your Future at EY

Benieuwd? Ontdek hoe jij jouw toekomst vormgeeft bij EY.

Waarom wij doen wat we doen?

Wil jij later impact maken met jouw financiële of vastgoedkennis? Wil je weten hoe je kapitaal inzet om maatschappelijke doelen te realiseren? Dat is precies waar wij ons elke dag mee bezighouden. Wij helpen woningcorporaties, zorginstellingen en institutionele beleggers om hun toekomstplannen financieel onderbouwd en duurzaam te realiseren. Geld is voor ons niet het belangrijkste – impact wel.

Wat maakt ons anders?

Bij ons werken ambitieuze en leergierige professionals die niet alleen uitblinken in financiën en vastgoed, maar ook continu willen begrijpen wat er écht speelt in de sectoren waarin we actief zijn. Niet voor niets hebben we drie hoogleraren en professoren in ons team en doen we continu onderzoek. We dagen elkaar uit, zoeken naar de beste oplossingen en blijven leren!

We geloven in “het kan altijd beter” en die mentaliteit zoeken we ook in studenten die willen groeien. Of je nu een carrière in finance, vastgoed of consultancy overweegt, bij ons krijg je de kans om te zien hoe je wetenschappelijke inzichten en data in de praktijk toepast. We zijn onafhankelijk, ondernemend en altijd op zoek naar nieuwe mogelijkheden. En wie weet, misschien is een stage of een juniorpositie bij ons wel de eerste stap in jouw carrière!

Wat betekent het voor jou?

Werken bij Finance Ideas betekent impact maken in een hecht en gezellig team. Er is ruimte voor samenwerking, gezamenlijke lunches en leuke teamuitjes. Persoonlijke groei staat centraal met bijvoorbeeld een opleidingsprogramma vol workshops en interviews. Daarnaast bieden we flexibele werktijden en de mogelijkheid om werk en privé in balans te houden.

In samenwerking met een andere organisatie en Finance Ideas is platform DAAN ontstaan. DAAN brengt data, kennis en analyses samen op één platform. Samen met consultancybureaus, Finance Ideas en Bolder Zorgcontractering, maken we strategische analyses breder inzetbaar. Data verzamelen, structureren en koppelen wordt zoveel mogelijk geautomatiseerd en analyses komen gestandaardiseerd beschikbaar. Zo start het gesprek sneller bij de uitkomsten en ontstaat meer ruimte voor beter onderbouwde beslissingen.

Waarom? Zorgorganisaties zoeken antwoorden op grote strategische vraagstukken. Toch worden data en analyses vaak nog arbeidsintensief, versnipperd en per organisatie opnieuw uitgewerkt. Terwijl de sector juist meer wil leren van elkaars kennis en ervaringen.

Case

Tijdens de case worden studenten in groepjes verdeeld om met elkaar het financiële vraagstuk op te lossen. Vervolgens presenteren de studenten hun oplossing van de case, waarna het beste groepje er met een leuke prijs vandoor gaat. Hoe de case er verder uit ziet, houden we graag nog even geheim!

Analytics with a No-Nonsense Approach

Gibbs is a specialized data analytics consultancy with a straightforward, no-nonsense approach, founded in Rotterdam in 2008. We help organizations make their processes and decisions more data-driven. Our projects span marketing, pricing, logistics and more, for clients such as KPN, CBR and Diergaarde Blijdorp. We solve real-world challenges using statistical modelling, forecasting, optimization, machine learning and AI. Working in small teams, often alongside our clients, we combine business knowledge with quantitative expertise to create lasting impact.

Life at Gibbs

Our culture is equally distinctive. We are a small and close-knit team of analytics professionals with a Rotterdam mentality: hands-on and straightforward. Working at Gibbs also means an office overlooking the Coolsingel, a healthy work-life balance, social events and regular knowledge-sharing sessions.

Your Thesis at Gibbs

Econometricians fit naturally at Gibbs and make up more than 80% of our team. We offer consultancy internships to students completing a master's degree in Econometrics, particularly within Data Science, Logistics and general Econometrics. You combine an academically challenging thesis project for a client with hands-on experience in a Gibbs project team.

Developing as an Analytics Consultant

As a junior analytics consultant, you follow our two-year internal training programme. You develop your skills in statistics, modelling, programming, data visualisation and AI, alongside consulting, communication and presentation. With intensive guidance and real client experience, you grow into an all-round analytics consultant who connects data, business and people.

Who We Are Looking For

Critical students who enjoy building quantitative models and turning insights into practical recommendations. **As most of our clients are Dutch, fluency in Dutch is required.**

Discover Gibbs in Our Presentation

We will explore three topics that showcase our work at Gibbs. First, what it's like to work at Gibbs. Next, one of our current interns will talk about her journey at Gibbs, from her thesis project to contributing to other client engagements. We'll also outline the internship opportunities available for students and how they can get involved. Finally, we'll dive into one of Gibbs' real-world projects, where we successfully visited a million restaurants in a month using powerful multimodal neural networks.

Healthcare Strategy with Quantitative Impact

Gupta Strategists is a boutique strategy consultancy focused exclusively on healthcare. Founded in 2005 and based in the Netherlands, we work across the sector, from hospitals and insurers to government bodies, pharmaceutical companies and patient organisations.

Our work ranges from strategic plans and market analyses to new business models, merger guidance and leadership development. We combine deep healthcare knowledge with rigorous quantitative analysis, working closely with clients so insights and capabilities remain within the organisation. Our core values are content, impact and independence.

Our vision

Looking ahead, our vision is that healthcare will keep facing intensifying pressure, rising demand, workforce shortages, cost constraints and that navigating this will require organisations that can combine strategic thinking with hard, quantitative evidence.

Why Econometricians Fit Gupta

Healthcare faces rising demand, workforce shortages and cost pressures, making quantitative evidence increasingly important. Econometricians fit naturally at Gupta because they can translate complex healthcare data into clear, defensible arguments. We look for curious, analytical people who enjoy working with data and can turn their analysis into recommendations a client can act on. Prior healthcare knowledge is not required, and you will be a full project team member from day one.

Moments of Impact

Gupta Strategists fits Moments of Impact because our entire purpose is to improve healthcare. We are a strategy consultancy that works exclusively in the sector, and every project we take on is judged by one question: does it demonstrably make healthcare better, whether that is more accessible, more affordable, or higher quality.

Sustainability is a natural extension of that mission, and it is an area where Gupta takes the lead rather than following. We use our analytical approach to help healthcare organisations, insurers, and policymakers understand where making healthcare greener will have the most impact, and to turn that understanding into concrete action instead of good intentions.

This combination, working on real healthcare challenges with hard, data-driven analysis, and taking a frontrunner role in making the sector more sustainable, is exactly why Gupta belongs among the Moments of Impact organisations.

Turning Losses into Profit

In the case, you will work with a Polish health insurer that has been operating at a loss despite continued growth in insured members. Using data about the insurer and the Polish healthcare system, you will investigate how the company can turn the tide and return to profitability.

Empowering People Through Data

At ING, we are transforming banking by combining technology, data and human expertise. As a global bank, ING operates in more than 40 countries and serves millions of customers worldwide. Our ambition is to make banking better, smarter and more personal through continuous innovation.

Where Data Meets Banking

Data plays a central role in almost every part of ING. From pricing financial products and predicting risks to improving customer experiences, analytics helps us make better decisions. At ING, data scientists, econometricians, analysts and business experts work together to turn complex data into solutions with real-world impact.

For students interested in econometrics, this means working on challenging problems where statistical models, algorithms and quantitative methods directly influence how a major financial institution operates.

Build Your Career at ING

ING offers a wide range of opportunities for students and graduates, including internships, entry-level positions and international graduate programmes. The Global Analytics Graduate Programme is a two-year programme consisting of three rotations, giving trainees the opportunity to explore different areas of the organisation and potentially work abroad.

During the programme, trainees gain hands-on experience building models, writing algorithms and solving business problems alongside multidisciplinary and international teams. ING also provides opportunities to develop skills in areas such as coding, statistics, visualisation and engineering.

Make an Impact

Whether you are interested in data science, financial risk, financial markets, technology or economic research, ING offers opportunities to apply your analytical skills to meaningful challenges.

Meet ING during the Econometric Career Days and discover how you can use your quantitative skills to shape the future of banking.

Shaping the Future with Technology

At KPMG, we help organizations tackle complex challenges by combining business expertise, technology and data. As a global professional services firm, KPMG works with clients across Audit, Tax & Legal and Advisory, helping them navigate an increasingly digital and data-driven world.

Where Analytics Meets Business

Data and quantitative analysis play an increasingly important role at KPMG. From financial modelling and risk management to artificial intelligence and advanced analytics, our teams use data to help clients make better-informed decisions. For students with a background in econometrics, mathematics, statistics or data science, this creates opportunities to apply analytical skills to a wide variety of real-world business challenges.

Start Your Career at KPMG

At KPMG, you can gain experience through internships, working student positions and graduate opportunities. You will work alongside colleagues from different backgrounds and disciplines, combining analytical thinking with business knowledge to solve challenging problems.

We value curiosity, collaboration and continuous development. From your first day, you will have opportunities to learn from experienced professionals, take responsibility and develop both your technical and personal skills.

Make an Impact

Whether you are interested in data analytics, risk, consulting, finance or technology, KPMG offers an environment where your quantitative skills can create real impact.

Meet KPMG during the Econometric Career Days and discover how you can turn your analytical mindset into a career in professional services.

McKinsey & Company

A Global Management Consulting Firm

Founded in 1926 and active in the Netherlands since 1964, McKinsey & Company is a global management consulting firm dedicated to helping organizations achieve positive, enduring change. We partner with leaders across the private, public, and social sectors to tackle their most pressing challenges and capture their greatest opportunities. What makes McKinsey unique is our ability to deliver end-to-end impact: we combine bold strategic counsel and deep industry expertise with cutting-edge artificial intelligence through QuantumBlack and venture-building capabilities through Leap. This allows our teams to not only design visionary strategies, but also build, scale, and embed sustainable solutions within organizations.

Our Purpose and Core Values

Our firm is steered by our dual mission: to help our clients make distinctive, lasting, and substantial improvements in their performance, and to build a firm that attracts, develops, excites, and retains exceptional people.

Career Opportunities and Recruitment

We welcome applicants year-round from diverse academic backgrounds for roles such as Business Analyst, Fellow, Junior Associate, and specialized analytics positions, as well as internships. Our recruitment journey consists of three main stages:

- Application: Submission of your resume and academic transcripts.
- Solve: McKinsey's gamified digital problem-solving assessment.
- Interviews: Two interview rounds combining Personal Experience

Interviews (PEI)—exploring leadership, resilience, and teamwork—with interactive case interviews based on real-world client engagements.

Step Into the Shoes of a McKinsey Consultant

Tijdens onze interactieve workshop stap je voor één dag in de schoenen van een McKinsey-consultant. Samen met medestudenten en consultants van ons kantoor in Amsterdam duik je in een actuele, strategische business case gebaseerd op een waargebeurd cliëntvraagstuk.

Je leert hoe wij complexe uitdagingen ontrafelen met onze gestructureerde probleemoplossingsmethode: van het formuleren van hypothesen en grondige analyses tot creatieve oplossingen en overtuigende storytelling. We dagen je uit om analytisch en grensverleggend te denken. Naast het inhoudelijke werk is er volop ruimte om onze consultants informeel te ontmoeten, al je vragen te stellen over onze cultuur en projecten, en te ervaren hoe het is om te werken aan de Amstel. Ben jij klaar om impact te maken?

Moments of Impact

Bij het ministerie van Financiën draait het niet alleen om cijfers, maar vooral om mensen. We zetten ons in voor gezonde overheidsfinanciën, duidelijke regels en een sterke economie – in Nederland én in Europa. Met ons werk zorgen we ervoor dat iedereen kan rekenen op zekerheid en perspectief. Als het gaat om goede zorg, onderwijs en een veilige leefomgeving bijvoorbeeld. Nu en in de toekomst. Wil jij daar met jouw talent aan bijdragen?

Wat zoek jij in je werk? Interessante inhoud, maatschappelijke impact of een internationale dimensie? Dan zit je goed bij Financiën. Want hier werk je aan thema's die ertoe doen voor Nederland én Europa, zoals de rijksbegroting en belastingwetgeving. Samen met collega's die net zo betrokken zijn als jij. Maak kennis met ze. Ontdek wat ze doen, waarom ze dat doen en hoe hun inzet dagelijks het verschil maakt.

Tijdens de ECD behandelen collega's van de directie Algemene Fiscale Politiek (AFP) een casus over Box 3 berekeningen. De directie AFP geeft adviezen aan de ambtelijke en politieke leiding van het ministerie van Financiën over het financieel-economische beleid en in het bijzonder het fiscale beleid. Ook zijn ze verantwoordelijk voor het ramen van de budgettaire effecten van fiscale maatregelen en het evalueren van fiscale regelingen, zoals specifieke aftrekposten.

About Milliman

Milliman is one of the largest independent consulting firms in the world in actuarial science, financial risk management and data science. From our Benelux offices in Amsterdam, Brussels and Luxembourg, around 50 consultants work for insurers, banks, pension funds and other financial institutions. Worldwide we are more than 4,000 people across over 30 countries.

What sets us apart

You take on responsibility from day one and work directly alongside experienced colleagues on real client questions. Teams are small, so there is no layer between you and the work. Projects range from risk modelling and pricing to AI applications, data science and M&A support. No two weeks look the same.

Our values

Independence, objectivity and technical rigour. Everyone here is expected to take initiative, take responsibility for their own work, and invest in the people around them.

Where we are heading

The actuarial profession is changing quickly. Regulation keeps evolving, data volumes keep growing, and clients increasingly bring questions that sit between actuarial science and data science. What stays constant is the standard we hold ourselves to. We want to keep doing work at expert level: assignments that are technically demanding, that require real depth rather than a quick answer, and that our people find genuinely challenging. Maintaining that professional and technical standard is what shapes the work we take on and the people we hire.

Why econometrics fits

You use your analytical toolkit daily: statistical modelling, programming in Python and R, and translating complex analysis into something a client can act on. Alongside that you develop as a consultant.

What we expect from a starter

Curiosity and initiative above all. Ask questions, say when something is unclear, and keep learning. Strong quantitative foundations matter, and so does the ability to explain your work to someone who is not a modeller. In return: challenging projects, close guidance from senior colleagues, and room to grow.

Come meet us at the beer tasting

Over a craft beer (or a non-alcoholic alternative) you will meet our consultants. No long presentation, just an informal afternoon where you can ask anything you want about consultancy, econometrics, data science, AI and the kind of projects we work on in the financial sector. Whether you are curious about our culture, the projects we run, or what it is like to start your career here, we are happy to tell you everything.

So grab a drink, meet part of our team, and see whether Milliman is a fit for you. See you there.

Data, Technology & Business

At Mount Analytics, we help organizations turn data into real business value. We work at the intersection of data, technology and business, tackling complex challenges for leading organizations. What makes us different is that technology is never the goal itself: we start with the business challenge and use data and analytics to build solutions that actually work in practice.

Your Career at Mount Analytics

But what really makes Mount Analytics an exciting place to start your career is the combination of big opportunities and a close-knit team. You get the challenge and exposure of consulting, without disappearing into a large corporate organization. From day one, you work closely with experienced colleagues, take real responsibility and have the freedom to ask questions, explore different areas of data and analytics, and discover where your own interests and strengths lie.

Entrepreneurship & Impact

Entrepreneurship is also a big part of working at Mount. Your role goes beyond your client project: everyone gets the opportunity to help build the company. You might explore a new AI application, contribute to developing an analytical model or product, organize an event or come up with an entirely new idea. Because we are still growing, your contribution is visible and can genuinely influence how Mount Analytics develops.

Personal Growth & Culture

At the same time, we invest heavily in personal growth. You can shape your own development path, learn directly from your own colleagues, and share knowledge through initiatives such as our Lunch &

Learn sessions. And although we take our work and expertise seriously, we believe work should also be fun, with a strong social culture, team events and plenty of informal moments together.

Join Mount Analytics

For students and recent graduates, there are opportunities to join us as a Data Consultant or Data Intern. We are looking for curious, analytical people who enjoy solving problems, learning new things and want to make an impact from the start.

Data Consultancy Dinner

Curious about what working in data and analytics looks like in practice? During our dinner, you'll get the chance to meet people from Mount Analytics and hear more about the kind of projects we work on.

In an informal setting you can ask us questions, learn more about data consulting and get a better idea of what it's like to work at a smaller, growing company. At Mount, you get a lot of responsibility early on, work closely with experienced colleagues and have plenty of room to develop your own interests.

Whether you're looking for an internship, thinking about your first job or simply want to explore the field a bit more, you're very welcome to join us for dinner and get to know Mount Analytics.

About NN Group

We are NN Group, a leading international financial services company headquartered in the Netherlands. With a history dating back to 1845, we serve over 19 million customers across 10 countries, offering a broad range of products and services in insurance, pensions, banking, and asset management. Our brands, including Nationale-Nederlanden, ABN AMRO Insurance, Movir, AZL, BeFrank, OHRA, and Woonnu, are well-established in the markets where we operate.

What Makes Us Unique

What makes us unique in the sector is our customer-centric approach, our long-standing heritage, and our commitment to creating sustainable value. We combine deep local expertise with international best practices to deliver solutions that meet the evolving needs of our customers. In the Netherlands, we are a market leader in life insurance and pensions, and we hold top-three positions in Central and Eastern Europe.

Our Values

Our core values Care, Clear, and Commit guide everything we do. We care for our customers, communicate clearly and transparently, and commit to their long-term financial well-being. These values also shape how we work with colleagues, partners, and society at large.

Our Vision for the Future

Our vision for the future is: we aim to help people care for what matters most to them. That's why we invest in digital innovation, sustainability, and inclusivity. We strive to make a positive impact on society by promoting financial well-being, and supporting communities.

Internships and Traineeship

At the moment, we have several internship positions available. The application process for the traineeship begins with an online assessment, followed by an online interview. The final stage is the Talent Selection Days, during which you will spend a day at our office and participate in various assessments.

Join NN Group

We place great value on diversity and are looking for individuals who share our values and want to contribute to a meaningful future.

For more information about our vacancies and the application process, please visit our careers page on the website.

About the Case:

For the students with a quantitative background NN made a fun game! The student will be the CFO of a large insurance company and have to make all the decisions.

What do you need? Quantitative insight, learning ability and.. a bit of luck

For more information about the case, check the NN Group page on our website.

Do you want to work with smart, helpful and driven colleagues? Do you want a substantive challenge and learn a lot? Then Ortec Finance is your place!

Working at Ortec Finance means working in an organization where long-term (customer) relationships are central. An environment in which colleagues are willing to help each other and customers. We offer you an organizational culture in which you can develop and get the best out of yourself. The culture is informal, flat and friendly. But also innovative: how can we jointly make our customers' work – but also our own work – better, more efficient and easier? Good ideas are always welcome. We give you every opportunity to develop your talents and applaud entrepreneurship. Ortec Finance is the leading provider of risk and return management technology and solutions. Our goal is to empower people to manage the complexities of investment decisions. We do this by delivering industry-leading investment decision technologies and solutions to financial institutions around the world. Municipalities and tax collaborations are also among our clientele. Our strength lies in an effective combination of advanced models, innovative technology and in-depth market knowledge.

During your studies:

At Ortec Finance you can gain experience as a student assistant during your studies. This is possible from 1 day a week. You can also graduate with us. We also offer you the opportunity to do both at the same time!

Ready to join us?

Ortec Finance is always looking for smart, driven colleagues with good ideas. Most people work for us as software developers, information analysts, business analysts,

quantitative financial analysts and consultants. But please contact us to explore together what suits you. Where your talents come into their own and you can develop.

If you are interested in what opportunities Ortec Finance has to offer you during or after your studies, please contact us via telephone number 010 – 700 –50 00 or by e-mail recruitment@ortec-finance.com.

On our vacancies page <https://www.ortecfinance.com/vacancies> you will find all current vacancies and thesis topics. If a vacancy or graduation topic appeals to you, we would like to invite you to apply via the application button. We will contact you as soon as possible.

We hope to meet you soon!

As a consultant, you will advise the board of a large pension fund. The board has hired you to give a recommendation on their strategic investment policy. With the use of the model and economic scenarios of Ortec Finance you will perform a study by analyzing different investment strategies. Considering all the preferences of the different stakeholders, you will give a recommendation. This recommendation and insights gained will be presented to the board to enable them to make a decision. The best recommendation will be rewarded!

About ORTEC

We are ORTEC, a purpose-driven organization changing businesses and society at large through the power of data-driven mathematical optimization. We make businesses more efficient, more predictable and more effective. Turning complex challenges into easy-to-use solutions.

ORTEC's products and services result in optimized fleet routing and dispatch, vehicle and pallet loading, workforce scheduling, delivery forecasting, logistics network planning and warehouse control. ORTEC offers stand-alone, custom-made and SAP® certified and embedded solutions, supported by strategic partnerships.

We serve clients in almost every industry. And with 17 offices strategically located across 4 continents, we can deliver solutions on a global scale. Always underpinned by local know-how and service.

Working at ORTEC

ORTEC is an ambitious organization. Since our founding in 1981, we have grown to employ over 1100 people at locations in Europe, the United States, Australia and Brazil. Most of our employees began working with us after completing their studies.

The average ORTEC employee has a technical master's or bachelor's degree, a strongly developed capacity.

The company's organizational structure is flat, with short lines of communication. The atmosphere is open and informal, which forms an excellent basis for a productive working environment.

You are invited to attend social activities organized by our employees' association, and the Friday afternoon drinks in our own ORTap. Furthermore, an excursion for your department or ORTEC as a whole is organized annually, such as the Christmas breakfast or a barbecue at one of the founders' homes. And in addition to the (Young) Professionals Development Program, each month Young ORTEC organizes activities to help develop your talent, increase your knowledge and expand your network.

Students and starters

We are always looking for ambitious students/starters who have affinity with IT, optimization and logistics. As a student you can do a graduation internship at ORTEC and as a graduate we have traineeship positions available or other junior positions. Please have a look at our career page for the current vacancies:

<https://ortec.com/en/careers/find-jobs/jobs>.

If you are interested in working at ORTEC, you can send your resume, motivation and grades list to recruitment@ortec.com

Meet us at the ECD

Who we are

Our purpose is to build trust in society and solve important problems. PwC is a leading global professional services provider, with more than 364,700 people across 136 countries. In the Netherlands, 5,785 colleagues work across three Lines of Service, supported by Internal Firm Services.

What we do

We help organisations tackle complex challenges through three main areas:

- Assurance: Auditing financial statements and providing assurance on information and systems, increasingly supported by AI-driven technologies.
- Tax & Legal: Delivering tax and legal advice, compliance services and expertise in workforce transformations.
- Advisory, including Strategy&: Helping organisations reinvent business models and deliver digital transformations, from strategy to execution.

What makes us unique

We are a Community of Solvers, bringing together multidisciplinary teams that combine sector expertise, technology and strategic thinking. As clients navigate rapidly changing markets and geopolitical developments, we help them turn complex challenges into practical solutions.

Our strategy is built around five objectives: Client Focused, Community of Solvers, Human-Led Tech-Powered, High Quality and Sustainable Growth. Our ambition is to be our clients' first choice, reflected in a client satisfaction score of 8.3.

Our vision for the future

We continuously reinvent ourselves to meet evolving client needs. With our AI First strategy and Next Generation Audit initiative, we are scaling technology while putting trust and quality first.

As a Catalyst for Momentum, we aim to contribute to the Netherlands' digital, defence, healthcare and climate transitions. We also strive to be an unrivalled place to work, where continuous learning empowers everyone to shape their own development.

Careers & Application process

We continuously recruit working students, graduation interns and graduates. Every application starts with your CV and motivation letter, followed by an online SHL assessment.

The next stage is a breedte-interview, covering your CV, motivation and assessment results with two interviewers. For graduate positions, a second, in-depth diepte-interview explores your knowledge, experience and motivation. Working-student and internship applicants have one interview.

You will receive feedback within 24 hours of each interview.

Who We Are

Rewire is a Data & AI consultancy that helps large organisations accelerate and scale the impact of data and artificial intelligence. We support clients across the world in driving AI transformation, from strategy and solution design to implementation and long-term support.

Our team of more than 100 data scientists, AI engineers, data & tech experts, and cloud & software engineers works closely with leading international organisations such as ASML, ABN AMRO, AstraZeneca, Booking.com, Bol.com, Brenntag, IKEA, ING, KPN, Rabobank, Roche, TÜV SÜD, and many more. Together with our clients, we develop practical AI solutions that deliver measurable business value and help organisations make better use of data.

Your Career at Rewire

For students and graduates, Rewire offers the opportunity to work on real business challenges from day one. You will collaborate with experienced colleagues, learn from leading experts in the field, and continue developing your technical and consulting skills through projects, coaching, and training.

Building AI Capabilities

Through our GAIN Academy, we also help organisations and professionals strengthen their AI capabilities. Our certified programmes support both technical specialists and senior leaders, creating strong AI teams and future-ready organisations.

Interested in Joining Rewire?

Interested in joining Rewire or learning more about opportunities? Get in contact via talent@rewirenow.com.

Solving a Real Client Challenge

In our case you work in small teams on a real client question from our own practice: an organisation that has to make decisions every day based on uncertain demand. You follow the same route we take with clients at Rewire.

From Data to an AI Solution

You start by mapping where the value sits, then choose for yourself which opportunity to pursue, and work that out into a conceptual model and a concrete design for an AI solution. After that you get to work with real data: you draw out insights, improve a forecasting model, and make sure the solution actually works for the user.

What to Expect

So do not expect a theoretical exercise, but an afternoon in which you make your own choices and have to defend them. Our consultants give feedback along the way.

Bring your own laptop; you will receive the preparatory setup instructions in advance, please make sure to follow them beforehand. You need to install an application.

Who We Are

Shell is een van 's werelds grootste energiebedrijven en is actief in meer dan 70 landen. Met ongeveer 85.000 medewerkers wereldwijd werkt Shell aan het leveren van de energie die mensen en bedrijven vandaag nodig hebben, terwijl we tegelijkertijd investeren in de energiesystemen van de toekomst.

Onze activiteiten bestrijken de volledige energieketen: van olie, gas, LNG en chemie tot hernieuwbare energie, elektrisch laden, CCS (carbon capture and storage) en duurzame brandstoffen. In Nederland speelt Shell een belangrijke rol op het gebied van innovatie, handel, onderzoek en mobiliteit. Zo is de Energy Transition Campus Amsterdam een van Shells grootste onderzoekscentra wereldwijd.

De naam én het bekende logo van Shell vinden hun oorsprong in een Londens antiek- en handelshuis uit de 19de eeuw dat handelde in oosterse schelpen.

Shell onderscheidt zich door haar wereldwijde schaal, technologische expertise en sterke focus op innovatie en de energietransitie.

Our Values & Vision

Onze kernwaarden zijn honesty, integrity en respect for people. Veiligheid staat centraal in alles wat we doen. Daarnaast stimuleren we samenwerking, inclusiviteit en persoonlijke ontwikkeling, zodat medewerkers het beste uit zichzelf kunnen halen.

Onze visie is om een toonaangevend geïntegreerd energiebedrijf te zijn dat waarde creëert voor klanten, aandeelhouders en de maatschappij.

Daarbij werken we aan de transitie naar een energiesysteem met lagere emissies, terwijl we betrouwbare en betaalbare energie blijven leveren aan onze klanten.

Why Econometricians at Shell?

Econometristen passen goed bij Shell omdat veel van onze uitdagingen vragen om analytisch denkvermogen, datagedreven besluitvorming en het modelleren van complexe systemen.

Binnen Shell worden deze vaardigheden bijvoorbeeld ingezet voor energiehandel, vraagvoorspellingen, prijs optimalisatie, risicomanagement, supply chain-optimalisatie en AI-toepassingen.

Van starters verwachten we een nieuwsgierige en proactieve houding, sterke analytische vaardigheden en de bereidheid om samen te werken in multidisciplinaire en internationale teams. Bij Shell krijg je vanaf dag één verantwoordelijkheid en de mogelijkheid om jezelf verder te ontwikkelen via trainingen, coaching en uitdagende projecten.

ECD 2026

About Sia

Sia is a global management and AI consulting group, born digital in 1999 and now over 3,000 consultants strong across 48 offices in 19 countries. In the Benelux, we operate from Amsterdam, our hub since 2009, and Maastricht, reinforced by the 2025 acquisition of Precedence. What sets us apart is the combination of strategic consulting with deep technical capability: Amsterdam houses one of Sia's four global Data Science Centers of Excellence, and we pair traditional management consulting with data science, AI, and RPA to help clients in banking, insurance, energy, retail, and transport turn transformation into measurable value. Over 90% of our clients have worked with us for years, a sign that we deliver on that promise rather than simply advise on it.

Our Culture & Values

Our culture rests on five values that shape how we work every day: optimism, entrepreneurship, collaboration, creativity, and client focus. We treat optimism as a force multiplier; the belief that transformation, whether driven by AI, climate, or new regulation, is an opportunity to capture rather than a risk to manage. That mindset sits alongside a genuine commitment to positive impact, reflected in our Consulting for Good approach.

Why Econometrics?

An econometrist fits naturally into this story. Our work depends on people who can translate numbers into decisions: building models, structuring data, testing assumptions, and communicating results clearly to clients who need to act on them. Those are the same instincts an econometrics background builds.

Your Development at Sia

From new employee, we look for curiosity and ownership rather than years of experience. We hand real client responsibility early, support it with a personal development plan and structured training, and expect strong analytical, clear communication, and a collaborative attitude in return. In exchange, you get fast-paced project variety, direct client exposure, and colleagues who take both the work and your growth seriously.

Data Consultancy Dinner

Met ons team van data science bij Sia zit je goed als je van cijfers houdt, maar minstens zo goed als je gewoon een leuke avond wil. We zijn sociaal, maar laten we eerlijk zijn: we zijn ook gewoon data nerds. Verwacht dus gesprekken over stages, carrière en hoe het is om als econometrist de consultancy in te gaan, met af en toe een zijstap naar een model of dataset waar we net iets te enthousiast over worden. Er komen collega's die ook econometrie hebben gestudeerd, sommigen zelfs in Rotterdam, maar ook mensen die iets anders hebben gedaan. Zo zie je gelijk de samenstelling van ons team. Vragen zijn altijd welkom, hoe klein of concreet ook. Hopelijk krijg je na deze avond een goed beeld van hoe leuk en leerzaam Sia is!

Sprenkels

Sprenkels

Wie we zijn

Bij Sprenkels zijn wij dagelijks bezig om complexe vraagstukken en strategische uitdagingen op het terrein van actuariaat en beleggen terug te brengen tot de kern. We gebruiken onze expertise en ervaring om onze klanten te voorzien van een data-gedreven strategie. We werken met kwantitatieve modellen aan innovatieve oplossingen.

Werken bij Sprenkels

Bij Sprenkels zijn we vindingrijk en nieuwsgierig. We zijn altijd op zoek naar uitblinkers die willen werken in een dynamische en uitdagende omgeving. Wij staan open voor de knapste koppen uit kwantitatieve disciplines, op zoek naar een rol met écht impact.

Bij ons krijg je direct veel verantwoordelijkheid en werk je op het scherpst van de snede. Je groeit bij Sprenkels zo snel als je zelf aan kunt, omdat wij geloven dat je sneller groeit zonder uitgestippeld pad.

Als consultant werk je mee binnen ons unieke bedrijfsmodel waarin ondernemerschap voorop staat. Samen met zo'n 120 ambitieuze collega's werk je rechtstreeks voor onze klanten. Je werkt op ons kantoor in Amsterdam of Rotterdam. Daarnaast krijg je flexibiliteit om hybride te werken. Onze consultants hebben veelal een achtergrond in econometrie, actuariaat of wiskunde.

Onze strategische uitdagingen

Tijdens onze sessie geven we een beeld van onze strategische vraagstukken. De pensioenhervorming is één van de grootste herverdelingen van kapitaal in de wereld. Dit raakt alle aspecten van onze sector.

Hoe beslis je of een fonds ophoudt met bestaan? Hoe geef je het nieuwe beleid vorm? Hoe communiceer je met je deelnemers? We nemen je mee langs de vragen waar de grootste fondsen van Nederland voor staan.

De case: jouw analytische skills in de praktijk

Sprenkels is een strategische adviseur voor veel van deze fondsen en helpt institutionele beleggers om hun doelen te halen. De consultants van Sprenkels passen hun kwantitatieve achtergrond toe om klanten zo goed mogelijk te adviseren.

Wij gebruiken econometrische technieken bijvoorbeeld om de prijs van een complexe optiestructuur te bepalen of om de impact van een klimaatbewust beleggingsbeleid vast te stellen.

In de case gaan we bouwen op jouw analytische skills om allerlei strategische uitdagingen uit de praktijk op te lossen.

Nieuwsgierig? Wij ook! Neem contact op met Marieke Klein:
06 55 530 249
werken@sprenkels.nl

Wie is Triple A – Risk Finance?

Triple A – Risk Finance is een onafhankelijk en innovatief consultancybedrijf gespecialiseerd op het gebied van actuariaat en risicomanagement, opgericht in 2006 en gevestigd in Amsterdam. Triple A is een bedrijf met een platte structuur en enthousiaste jonge professionals. Mede door de korte lijnen met het management is er volop ruimte voor eigen inbreng en verantwoordelijkheid. Dit geeft onze medewerkers de kans om buiten de gebaande paden te gaan en de vaak kwantitatief uitdagende opdrachten met een creatieve benadering op te lossen.

Wat doet Triple A – Risk Finance?

We werken vanuit de business lines: Pensions, Insurance, Risk & Strategy Consulting, Banking, Actuarial Technology en Data Analytics. Onze klanten variëren van grote multinationals tot kleine ondernemingen onder te verdelen in banken, verzekeraars, pensioenfondsen, pensioenuitvoerders en werkgevers. We werken vanuit ons eigen kantoor, thuis en op locatie bij de klant.

Voorbeelden van werkzaamheden zijn onder andere:

- Ontwikkeling van actuariële projectiemodellen
- Uitvoering van risicoanalyses
- Prijsstelling van schade- en inkomensverzekeringen
- Advisering over nieuwe pensioenregelingen
- Asset & liability management
- Ontwikkeling van krediet- en marktrisico modellen
- Verslaglegging

Een standaard carrièrepad bestaat dan ook niet binnen Triple A. Je ontwikkelt je als risk

professional met je eigen accenten. Kortom, we bieden uitgebreide mogelijkheden tot een zeer uitdagende carrière in de consultancy op het gebied van actuariaat en risicomanagement.

Hoe is de werksfeer bij Triple A – Risk Finance?

Triple A – Risk Finance is een jong en dynamisch bedrijf. Dat geldt zowel voor het bedrijf zelf, als voor de mensen die er werken: de gemiddelde leeftijd van de consultants ligt rond de 33 jaar. Het bedrijf is volop in ontwikkeling en bestaat uit een team van zo'n 160 mensen. Het is het gevolg van de unieke dynamiek binnen Triple A: een gevoel van ondernemerschap en vastberadenheid om samen ergens voor te gaan. De dynamiek vind je binnen het hele bedrijf terug in de manier van werken en de sfeer op kantoor. De omgang met collega's is open en informeel, en tegelijkertijd gaan we met z'n allen voor het beste resultaat.

Meer weten?

Wil je meer over Triple A – Risk Finance weten, bezoek dan ook onze website www.aaa-riskfinance.nl voor meer informatie of neem contact op met Iris Koot – iris.koot@aaa-riskfinance.nl of +31 (0)6 156 316 191

Royal Vopak – Storing Vital Products with Care, Powered by Data & Operations Research

Royal Vopak is the world's leading independent tank storage company. With a history spanning over 400 years, we store and handle vital products that keep society moving—ranging from chemicals, oil, and gases to LNG, and increasingly new energies such as hydrogen, ammonia, biofuels, and CO₂. We operate an extensive global network of over 70 terminals situated at critical crossroads of international trade flows across 23 countries.

What makes Vopak unique is the intersection of large-scale physical infrastructure with cutting-edge digital intelligence. In our terminals—from Rotterdam to Singapore and Houston—complex physical operations demand high-precision mathematical decision-making. Our Global Analytics & AI team leverages Operations Research, quantitative modeling, and machine learning to optimize jetty scheduling, multi-commodity tank allocation, flow forecasting, and energy efficiency. At Vopak, mathematical models directly steer critical infrastructure on a global scale. We have also started our company Gen AI journey upskilling our staff and building AI solutions to create business value.

Our Core Values

Our culture is anchored by three cultural pillars: Trust (binds us across continents), Collaboration (drives innovation and operational excellence), and Courage (shapes our future, empowering us to pioneer new solutions)—with an unconditional foundation in Safety, Health, and Sustainability.

Career Opportunities & Team Growth

We actively welcome quantitative talent. Our team is expanding rapidly: Wessel Verhagen will join on November 1st, followed by Justin Starreveld on January 1st, both dedicated to Operations Research, Analytics, and AI. We offer thesis internships, working-student positions, and graduate career paths. Our recruitment process is straightforward and personal: an introductory alignment call, a collaborative case discussion to explore your quantitative problem-solving skills, and a final mutual fit conversation.

Presentation

During our interactive presentation at the Econometric Career Days, we'll take you behind the scenes of our Global Analytics & AI team. You'll discover how mathematical optimization and econometrics solve complex operational planning puzzles—from jetty scheduling and tank allocation in Rotterdam and Singapore to forecasting flows across global energy hubs.

Meet (part of) our team (including our newest OR colleagues!), explore how your quantitative mindset drives real-world operational impact, and learn about our thesis internships, working-student roles, and graduate opportunities. We look forward to meeting you!

ECD 2026

valcon

Valcon is a full-service provider that works at the intersection between consultancy, technology, data, advanced analytics and strategy. Situated in The Netherlands, The United Kingdom, Denmark, Sweden and Germany, Valcon forms a North-West European community helping clients across national borders. With over 1000 colleagues, we focus on end-to-end transformations in which we create long-lasting and sustainable value together with a human approach.

We know that every link matters in improving a company's value chain. We support our clients in pursuing the right change in people, system, and process. Our involvement is based on deep knowledge and experience, working shoulder to shoulder with many different organisations. We do not blindly follow a methodology; we follow through on getting things done.

No matter where you are on your path into the future, we hope that our paths could join. We are passionate about bringing our clients into the future, but pragmatic when it comes to methodologies. How we deliver is as important as what we deliver. We are doers who think. Are you also passionate about making a difference, pragmatic when needs to be and just overall a great human being? Then we would love to hear from you.

The Core Values of Valcon Integrity

We are honest, transparent, and dare to be authentic. We have respect for each other and our clients and take responsibility.

Together

We co-create solutions with our clients, by working in high performing teams built on diversity, respect, and trust.

Joy

We enjoy our work and promote a positive environment. We are passionate and love to take on challenges.

Can do

We are bold in our belief that nothing is impossible. We approach every task with a positive, ambitious yet no-nonsense attitude to realize sustainable solutions for our clients.

Curious

We are humble about what we know and always ask questions. We strive to learn and welcome feedback to deepen our understanding.

About the Case

The Sneaker Factory is een innovatieve sneakerfabrikant die zich richt op duurzame productie met 0% afval en voor elk verkocht paar een boom plant. Hoewel het bedrijf sterk groeit, ontbreekt het de bestuursleden aan duidelijke inzichten in welke producten, winkels en verkopers het best presteren. Zij hebben daarom gevraagd om ondersteuning bij het verkrijgen van heldere en datagedreven inzichten in de prestaties van hun producten, winkels en medewerkers, zodat zij onderbouwde strategische beslissingen kunnen nemen.

We only hire Dutch people

VAN LANSCHOT KEMPEN

For nearly three centuries, Van Lanschot Kempen has been an independent wealth manager, specializing in private banking, investment management, and investment banking. Our long history defines who we are, as it has given us a true understanding of the value of time. We view wealth as a matter of generations rather than quarters, and we are committed to sustainable, long-term growth. Throughout this time, our clients have always come first. That's why we ask them: How would you like to spend your time?

We manage around €149 billion in assets (as of 31 December 2024) and employ about 2,200 people. Van Lanschot Kempen shares are listed on Euronext Amsterdam.

Our core values are:

- Personal: We build lasting relationships with both our clients and our colleagues.
- Specialized: We focus on a select range of services and have deep expertise in these areas.
- Entrepreneurial: We encourage innovation and growth, both for our clients and within our firm.
- Decisive: We make clear, long-term choices—and we stand by them.

We regularly hire (thesis) interns and working students with a quantitative background, particularly in our Financial Risk Management domain. Additionally, we recruit several interns for our Quant team on the trading floor.

For all of these positions, you can apply with your CV. Applicants will be invited to complete an assessment to measure both cognitive and behavioral skills. Successful candidates will be invited to our offices for interviews that focus on both motivation and technical ability.

We look forward to meeting you at the ECD!

14:30 - 17:30 & 18:30 - 21:00

ECD 2026

Van Lanschot Kempen

| EN |

Our workshop is designed to provide participants with insights into how econometrics can be applied in healthcare, specifically in the context of screening. Attendees will get an introduction into how screening programs can be optimized to maximize population life-years, while minimizing costs. Using real-world examples, participants will be introduced to the tools and methods used in our studies, including simulation models and cost-effectiveness analysis. The workshop will be taught by researchers from the Erasmus MC with a background in econometrics themselves.

Meet us at the ECD
Workshop
Tuesday 17 November
10:15 - 13:00

"Build your own second brain, with AI agents in it". A hands-on session of about 2.5 hours where students set up their own AI brain: a folder of plain notes about their studies, applications and personal projects, with agents in it that keep track of what happens, sort it and recommend what to do next. It becomes a persistent memory for every conversation they have in the future with AI. The brain starts empty and gets better as they feed it. We start from a simplified version of the system SkillMix runs its own company on. At the end every student has something that actually works and that they can keep using the next day.

Workshop Who am I, what do I want?

Not sure yet what you want to do after your studies? Or do you have some ideas, but want to take a closer look at what is important to you when thinking about your future career?

In this interactive workshop by Career Services, you'll take the first steps in exploring who you are, what you're good at and what you value in your future work. Through practical exercises, you'll reflect on your skills, interests, personality and career values, and use these insights as a starting point for exploring possible career directions.

We'll also work with AI during the workshop, so please bring your laptop.
